

Smith

Matt Smith is a local artist, born and raised in Oxfordshire. This is the first time he has exhibited his stunning painterly canvases. A self-taught artist his desire has always been to create works of originality and unique content.

He strives to portray the truth in his deep and meaningful pieces. He focuses on the psychology of the human brain as he projects a state of mind through the use of the paint and his imagery.

"I find the darkness of the human mind intriguing and of a particular interest is the way life events develop our individuality."

Smith's work is inspired by the rawness of urban art and the imperfections of the modern world and how it moulds a person's character and soul.
